

Panels

Ideal system to fence and protect sport areas.

Bekasport®

Benefits

Maximum height

The Bekasport post system is available for ball-stop in heights up to 6 m.

Very high rigidity

The use of Nylofor 2D Super panels makes the whole system extremely rigid.

Limited impact on neighbourhood

The available sound damping clips limit strongly the noise generated by impact on the fence.

Applications

The Betafence unique ball-stop system is an ideal solution for fencing sport- or playgrounds. The system is a combination of a special post with panels type Nylofor 2D Super.

Posts

The rectangular posts (standard green RAL 6005) are equipped with plastic sound damping clips. Thanks to a special insert in the posts these clips are located within the post. This means that the clip is an installation aid for hanging the panels. After hanging, the panel is fixed to the Bekasport post by means of adapted steel clips (standard green RAL 6005).

Panels

Nylofor 2D Super: - till 2 m high: 200 x 50 mm
- from 2 m high: 200 x 100 mm

Colour

Green RAL 6005. Other colours: on request.

Installation

When installing posts in a concrete wall, it is necessary to make sure that water is not able to remain inside the post.

NEEDED MATERIAL BEKASPORT					
Height fence mm	Dimensions panel Nylofor 2D Super width x height mm			Dimensions post mm	
	Mesh 200 x 50 mm width x height mm	Mesh 200 x 100 mm width x height mm	Number of fixings per post	Height post mm	Profile post mm
3100	2500 x 2030	+ 2500 x 1030	10	3800	70 x 50 x 2.00
4100	2500 x 2030	+ 2500 x 2030	12	4800	80 x 50 x 3.00
